

# Winter Adaptations

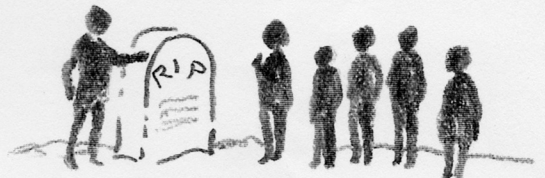

*Directions: Look at each creature on the page below. How do these living beings tend to react to the approach of winter? Please write the word or words that describe each creature's behavior next to the creature's picture. Alternately, draw a line from each creature to its typical autumn/winter behavior.*

Migrates

Hibernates / Becomes Dormant

Dies but leaves behind many offspring (often in the form of seeds or eggs)

Keeps Active
